INTRODUCTION

This report presents the construction chronology of deployed probable ABM and long range SAM launch complexes in the USSR as of [redacted]

25X1D

Seven probable ABM launch complexes have been identified in the Soviet Union, all of them deployed in the Moskva area. As of [redacted] 23 probable long range SAM launch complexes have been identified; however, the chronology of the 2 complexes at the Sary-Shagan Antimissile Test Center has not been included in this report. The function of the Sary-Shagan probable long range SAM sites (i.e., training, research and development, or deployed complexes) has not been determined. See Figure 1 for deployment of both types of complexes. Table 1 presents significant data for the probable ABM complexes and Table 2 for the probable long range SAM complexes.

25X1D

Figures 2 to 14 are photographs of probable ABM and long range SAM launch complexes not previously published in NPIC briefs or reports. See References for listing of related photo intelligence documents.
